

SILVERTON TEAMKIDS NEWSLETTER

WHAT'S BEEN HAPPENING

This term, children have been enthusiastically engaging in a variety of STEM-related activities, encouraging curiosity, problem-solving, and collaboration. Through hands-on experiences, they've explored the wonders of science and technology in ways that connect with their everyday lives. We've experimented with different **science concepts**, decoded messages using **Morse code**, and worked together to build creative structures using **LEGO mechanics**. These activities have helped foster a strong sense of *belonging* as children share ideas, support each other, and celebrate achievements.

The excitement is building as we prepare for the **Great TK Boat-Off**, where children will design and create boats to test and race. This project supports *being* by allowing time for play, imagination, and persistence, while also helping children *become* confident learners and team players. This week, we've also been celebrating **Book Week** with themed activities, reading sessions, and creative crafts that explore the power of storytelling. The week will finish with a special party on Friday to celebrate our love of books and learning.

IMPORTANT DATES

 **Thursday 4th September**
Father's day Grab and Go Breakfast

 **Friday 19th September**
Last day of Term three

 **Monday 22nd Sep to 3rd Oct**
Spring Vacation Care – Program out soon!
